**Aerosol Therapy**

**TriggerNeb™ High Performance Nebulizer**

Unlike traditional nebulizer sets, the TriggerNeb™ High Performance Reusable Nebulizer is trigger activated and features two separate modes: Intermittent (Trigger) and Continuous. Intermittent mode allows you to use the trigger to start/stop treatment and reduce medicine waste. Designed to convert liquid medication into aerosol for inhalation by the patient, the TriggerNeb™ Nebulizer is ideal for both pediatric and adult patients. The TriggerNeb™ Nebulizer is the only fully integrated dual-mode nebulizer with breath-enhanced technology. This means less medication waste, and more effective treatments. Plus, this nebulizer set has consistently shorter treatment times than other reusable nebulizer sets.

**Product Features**

- Patented dual-mode treatment allows patient to use in continuous mode, or intermittent (trigger) mode
- Less than three minute total treatment time
- Reusable nebulizer kit for up to 28 days in a hospital setting and 6 months in the homecare setting
- Designed with breath-enhanced technology for less medication waste and more effective treatment
- Ergonomical bottle design is easy to hold and control
- Single patient use
- Safe for adult or pediatric use
- Dishwasher safe
- Comes complete with TriggerNeb™ reusable nebulizer bottle, mouthpiece and supply tubing
- HCPCS Code: A7005* for reusable nebulizer kits
