

TheraTouch® CX2

Portable Combination Therapy

The TheraTouch® CX2 is an advanced combination two-channel therapy device. This portable electrotherapy and ultrasound system offers practitioners a wide range of treatment options in one user-friendly, ergonomic design; and the rechargeable battery gives flexibility to where treatments can be performed.

Equipped with a full color, menu driven touch screen and bilingual interface, the TheraTouch CX2 guides you step by step when setting up treatments manually or when selecting from predefined clinical protocols – all with editable parameters.

The therapeutic ultrasound can be used in combination with electrotherapy through the sound head or independently with different treatments running simultaneously. The CX2 also includes a patient remote button, allowing patients to stop treatments if needed, while the clinician is away.

- 8 stimulation waveforms, including RAAS
- 1 MHz and 3 MHz therapeutic ultrasound
- Patient Remote Button
- Bilingual User Interface
- Three-year warranty

TheraTouch® CX2 Rechargeable Battery

The TheraTouch® Rechargeable Battery for CX2 is designed to conveniently treat patients when an electrical outlet is not available, allowing therapy to be provided on or off site for a limited amount of time. The battery arrives charged and ready to use upon assembly.

- Alternative power supply option
- One-year warranty

*Charge capacity is based on the intensity level and waveform used while treating patients on the battery alone.
