Maintenance of your Lumin® BULLET 9

FAQ 10

Thank you for your recent purchase of the Lumin® BULLET Hose Sanitizer. The BULLET was developed by 3B™ Medical, a manufacturer and distributor of CPAP devices and masks.

The Lumin® BULLET device may be used with all brands of tubing, including heated hoses.

The Lumin® BULLET disinfects using a very specialized and high powered UVC light source, the same type of light source used in hospital operating rooms and sterile clean rooms. UVC light will disinfect up to 99% of harmful bacteria, pathogens and fungi that can cause infection and illness. UV light is fast, safe and clean. There are no harmful chemicals.

The 3B™ Lumin® and Lumin® BULLET products are intended to supplement your CPAP accessory manufacturer's cleaning recommendations.

Please read and follow all directions in this user manual. Any questions can be directed to support@3Bproducts.com.

Helpful Hint:

We recommend disinfecting CPAP hoses twice weekly, and daily during cold and flu season.

Indications for Use

The Lumin® BULLET is a device intended to disinfect Continuous Positive Airway Pressure (CPAP) hoses. A person using a PAP device to treat Obstructive Sleep Apnea (OSA) may use BULLET to sanitize their hose and heated tubing to augment their PAP equipment manufacturer's recommended cleaning instructions. The Lumin® BULLET is intended for home use.

 **Warning** - the Lumin® BULLET is not a toy and is not intended to be used by children.

 **Warning** - the Lumin® BULLET has a powerful UV light LED included.

 **Warning** - do not use in or around sinks, tubs, pools or any bodies of water.

 **Warning** - This device uses powerful magnets, please exercise caution if you have an implanted medical device affected by magnets (pacemakers, internal defibrillators)

 **Warning** - use this device only for its intended use as described in this manual. If the equipment is not used in the manner specified, the protection provided by the equipment may be impaired.

 **Warning** - Do not attempt to operate this device with the shell open. The device was designed to shut off automatically when the shell is open. It is important not to defeat or tamper with this safety feature as UVC light can cause damage to eyesight.

SPECIFICATIONS

SKU:	LM4000
Weight:	10.5 oz.
Dimensions:	8.5" x 2.5" x 2.5"
Voltage:	DC 5V 500mA
Power Rating:	3W
Environmental Conditions:	
Storage Temperature:	0° to 120° F / -18° to 49° C
Operating Temperature:	20° to 104° F / 7° to 40° C
Humidity:	Up to 93%, non-condensing
Altitude:	Up to 2000 M

EXPLANATION OF SYMBOLS USED

Equipment protected throughout by double insulation or reinforced insulation

Refer to instruction manual

Important information concerning your safety or the operation of your device

Understanding Your Lumin® Cleaner

The Lumin® BULLET operates using a specialized high powered germicidal UV LED. UV disinfection is effective on bacteria, viruses, mold and fungi and is well suited for keeping your CPAP tubing free from pathogens that can make you sick. CPAP hoses are in contact with warm moist air throughout the night, the ideal environment for breeding bacteria. Use of the Lumin® BULLET will help keep you healthy and compliant with your CPAP equipment.

Because the Lumin® BULLET operates using a form of high energy light, it is very effective in disinfecting your CPAP tubing. To keep your hose clean and reduce the risk of infections, we recommend using BULLET twice weekly on your hose. Maintain healthy breathing with quarterly replacement of your CPAP hose. 3B's Ultra Noir CPAP hose is available from your Lumin® BULLET reseller or online at 3BLumin.com.

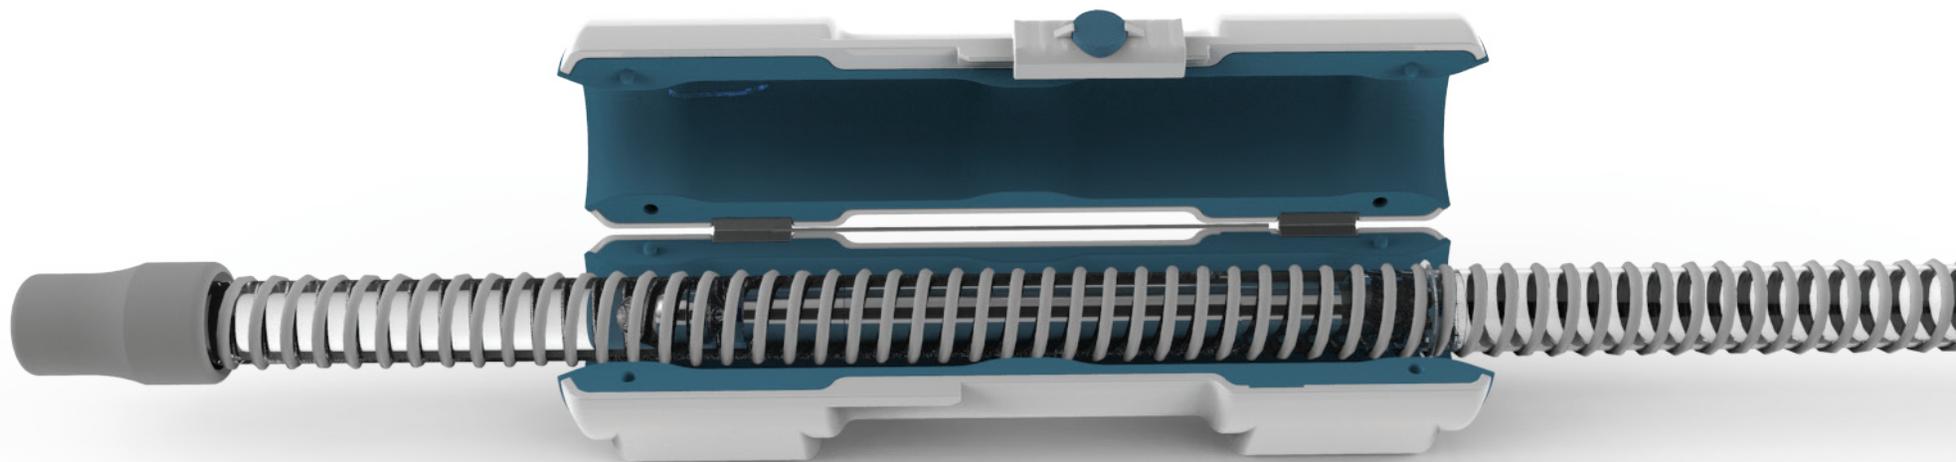

Using your Lumin® BULLET

1. Charge Lumin® BULLET by plugging in USB cord to bottom of BULLET.
2. The BULLET will glow RED while charging, and GREEN when fully charged.
3. Remove BULLET and place inside CPAP tubing so there is enough tubing hanging over to pull the tubing.
4. Place BULLET in shell, you will feel the magnets grab the BULLET.
5. Close shell and slide clasp until the shell locks, your BULLET is now activated.
6. Pull the tubing all the way to the right, then back to the left, ensuring you cover the entire length of tubing twice, this process should take 30-60 seconds for optimal disinfection.
7. Remove hose from BULLET, it is now ready to use.

Caring for your Lumin® BULLET Device

Should the shell casing of your 3B™ Lumin® BULLET become soiled you may wipe down with any moist cloth. Do not immerse your Lumin® BULLET into water or any cleaning solvents. Place your BULLET on a level counter or tabletop. Do not drop your Lumin® BULLET or damage may occur.

Frequently Asked Questions

What is the Lumin® BULLET?

Lumin® Bullet is designed to disinfect your CPAP hose. Your CPAP hose carries moist warm air. After use, it can become a breeding ground for bacteria. The thin layer of slime that grows on the dark inside of your hose is called a biofilm. Lumin® Bullet was designed to prevent the growth of this biofilm.

How does it work?

The Lumin® Bullet works with a powerful germicidal LED that emits ultraviolet light. That light is reflected 360° to reach every area of your CPAP hose. The hose interior only requires 1 second of exposure to disinfect harmful germs

Does it require batteries?

No. The Lumin® Bullet works off of a USB charger. Once fully charged the Bullet will glow green, indicating it's ready to use. Your fully charged Bullet will last up to 30 uses.

Is Lumin® Bullet compatible with every CPAP hose?

Lumin® Bullet is universally compatible with almost every brand and style of CPAP hose and heated tubing. The Lumin® Bullet, however, is not compatible with the ResMed Climate Line heated hose.

WARRANTY

Your Lumin® BULLET is warranted for a period of 1 year from time of purchase to be free from manufacturer defect or workmanship. Should you encounter a warranty issue please contact 3B™ Medical at www.3BLumin.com to submit a return authorization or email support@3bproducts.com.

It is at the discretion of 3B™ Medical to repair, replace or exchange your Lumin® BULLET unit should it be necessary. 3B™ Medical is not liable for misuse, mishandling or breach of this written guarantee. Attempts to alter the Lumin® in any way will void warranty.
